Dear Wolfgang

I have now written to four of the five proposed tutors. Unfortunately I do not seem to have an address for Wender, nor an initial. Do you have this information? If so perhaps you could let me have it.

With best wishes,

Yours sincerely,

Alan Baddeley

Dr. J. Raijmakers,
Institute for Perception TNO,
Postbus 23, Kampweg 5,
Soesterberg,
The Netherlands.

Dear Jerone,

The new European Society for Cognitive Psychology is planning to hold its first Summer School next year on the topic of Cognitive Approaches to Memory. Plans are still slightly tentative since funding has not yet been confirmed, but we expect to hold it between the 21st of June and the 4th of July 1987, in an 18th Century monastery on the edge of the Starnbergsee just south of Munich. We have sought funding for 40 students, who will be research students and immediate postdoctorals, and a number of teaching staff. Some staff were chosen because they are associated with a particular theoretical approach or line of research, and who will be asked to lecture on that specific approach. Others are selected because they combine excellence in research with breadth and something of a flair in teaching small groups. We wondered if you would be prepared to be one of the five people looking after this latter crucial tutorial aspect of the Summer School. The other four we are asking are Graham Hitch, Asher Koriat, Gery d'Ydewalle and a Dr. Wender from West Germany. The main teaching commitment would be to a one-hour study period between 11.30 and 12.30 when you would need to be available for consultation, and a two-hour tutorial group between 4.00 and 6.00 in the afternoon, with a mixed group of about eight graduate students.

We began by approaching potential lecturers to talk on specific topics, and I am happy to say that everyone we invited has accepted. They are Geoff Hinton from Carnegie-Mellon to talk on connectionism, Tulving to talk about the Toronto approach to the study of memory, Weinert from Munich to talk about developmental aspects of memory, Gregory Jones from Bristol to talk about schema theories, Wagenaar from Leiden to talk about everyday memory, Kintsch to talk about memory and comprehension, and myself to talk about working memory. The organiser will be Gerhard Strube from Munich, and he will also be talking on everyday memory. I think it should be a very interesting meeting, and possibly a very important one, bringing together what we hope will be the liveliest young graduate students and postdoctorals in the area in Europe.

We have applied for funding to the Volkswagen Trust, and are reasonably optimistic. This would allow us to cover all your expenses. We would like to be able to pay a small honorarium also, although we do not yet have a source of funds for this. Since funding is still in doubt, our invitation has to be provisional, but I hope very much that you will be able to accept it.

With best wishes,
Yours sincerely,
