

SUMMER SCHOOL "COGNITIVE ASPECTS OF MOTOR BEHAVIOUR"

Ohlstadt (FRG/Bavaria), August 18 - 31, 1991

ADDENDUM 1 TO THE PROGRAM: STUDENTS' PRESENTATIONS

(A) Friday, 23.8.1991, 19.30 - 21.30

- J. SMEETS Coordination of fast goal directed movements
- J. DE GRAAF Directional information during slow goal-directed
arm movements
- H. BEKKERING On the time course and accuracy of spatial
localization
- M. BRECHMANN A visuomotor analysis of pointing and bisection
in human subjects

(B) Tuesday, 27.8.1991, 19.30 - 21.30

- M. BRÜWER The human arm as a redundant manipulator
- U. MÜLLER A neuron-like network of six coupled oscillators
which has the ability to learn coordinated movement-
patterns
- Y. ROSSETTI The contribution of oculomotor and cephalic
activities to internal representation of space
- R. SEMMLER Cognitive aspects of motor behavior of young
handball players

(C) Thursday, 29.8.1991, 19.30 - 21.30

- G. VAN BOXTEL Stimulus anticipation and motor preparation in
human slow brain potentials
- M. ZIESSLER Interaction of perception and motor programming
- S. CONNOLLY The effect of cognitive functioning on walking
in healthy elderly and stroke patients
- D. RAPAIC Some cognitive and motor behaviour correlation
in head trauma patients
