

Invitation

to doctoral students and other young scientists

---

A joint summer school of the European Society for Cognitive Psychology and the MUCOM consortium within the European Research Program ESPRIT II

Cognitive Aspects of Motor Behavior

will be held in Ohlstadt (FRG, Bavaria) from 18.8.1991 - 31.8.1991

The summer school offers a time of intensive study and ample opportunities to get in touch with people from different countries and different disciplines who work on related problems, all this in a pleasant surround. The daily program includes lectures by internationally reputed scientists, tutorials, workshops, individual study time, time for informal meetings and also opportunities to discuss own research. Guest lectures will be presented by distinguished scientists. - The major lecture series will cover the following topics: (1) History of Motor Research, (2) Kinematics and Dynamics in Biological Systems, (3) Neural Basis of Higher-level Motor Control, (4) Cognitive Setting of Automatic Modes of Motor Control, (5) Formal Approaches to Motor Control, (6) Movement and Perception, (7) Motor Planning, (8) Coordination, (9) Motor Development. Guest lectures are planned on Robotics, Brain Imaging, Movement Coding in Motor Cortex, Imagery and Movement, Cognitive Skills.

We envisage a group of 40 students from different European countries and different disciplines, mainly, but not exclusively, Psychology and Physiology. Students of the summer school should preferably pursue some own work in the field indicated by the general topic of the summer school or in a closely related area. Doctoral students and young scientists who are interested in participating should write to

Herbert Heuer  
Fachbereich Psychologie  
der Philipps-Universität  
Gutenbergstr. 18

D - 3550 Marburg/Lahn  
FRG

to obtain further material. Deadline for applications is March 15, 1991. Final decisions about participation will thereafter be made by a joint committee of ESCOP and MUCOM.

Students of the summer school are expected to contribute a moderate amount to accommodation and meals (about 400,- DM); otherwise accommodation and meals will be free, and travel support will be available that covers most of the expenses. (In the case of problems with currency control regulations special arrangements can be made.)

Organizers: A. Berthoz, Paris; H. Heuer, Marburg; M. Jeannerod, Bron; P. Viviani, Geneva; A. Wing, Cambridge.

Financial Support: Volkswagen-Stiftung, Hannover, FRG
